Nasir Mirza

(Financial Analyst)

Nasir mirza is a well known Technical and Derivative Analyst in the field of financial markets: 'As a trader and writer, he has the natural ability to explain and breakdown the technical information of the market or a security and tell the traders and learners how it works and how to implement the various technical tools in a well-defined chronological and in a well descriptive manner"

His brilliant academic background spans commerce and finance. He is CS [pursuing final] from INSTITUTE OF COMPANY SECRETARY OF INDIA [ICSI]. He has started his journey of financial markets as a retail investor in around 2003 with little knowledge of stock markets. As by nature he was made for this market lots of ups and downs, profits and losses did not break his long lasting interest and keen observations of the market.
